

ENVIRONMENTAL REQUIREMENTS FOR SUPPLIERS

Rev. 02 – 01/09/2025

At Técnicas y Servicios de Ingeniería y Control del Norte SL (hereinafter, TESICNOR), we are committed to environmental preservation. Therefore, we work to minimize our environmental impact, ensuring the responsible use of natural resources and reducing environmental pollution in the form of waste and emissions. To convey this commitment to all stakeholders of the organization, TESICNOR has implemented an Environmental Management System based on the UNE-EN ISO 14001:2015 standard. This system includes communicating our Environmental Policy and applicable environmental requirements to our suppliers, without whose collaboration, the implementation of our environmental principles in the performance of our work cannot be guaranteed.

As a supplier or potential supplier of TESICNOR, we expect you to demonstrate and assume the same commitments described in our Environmental Policy, as well as the environmental requirements described below, available on our website <https://www.tesicnor.com/certifications-and-accreditations/>. TESICNOR may request the necessary documentation to prove compliance with the environmental requirements detailed here:

All:

-  Compliance with environmental legislation applicable to your activities.
-  Have an environmental policy.
-  Efficient use of natural resources, and whenever possible, from renewable sources.
-  Correct waste management, promoting recycling and reuse whenever possible.
-  Emission and waste disposal control.
-  Registration and communication of Environmental Impacts associated with your activity.
-  Use sustainable products and materials whenever possible (recycled materials, lower carbon footprint, etc.)
-  Efficient transport (route management, electric vehicles, etc.)

Non-hazardous waste managers:

-  Be accredited as an Authorized Manager.
-  Waste removal contract.
-  Certificate of withdrawal / quantity of waste.
-  Waste Transfer Identification Document (DIR)

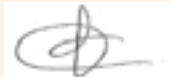

- Final waste treatment (Delivery sheet, certificate of final destination, quantities and management and environmental compliance certificate)

Hazardous waste managers:

- Be accredited as an Authorized Manager of hazardous waste.
- Waste removal contract.
- Certificate of withdrawal / quantity of waste.
- Waste Transfer Identification Document (DIR).
- Waste Tracking Sheet.
- Final waste treatment (Delivery sheet, certificate of final destination, quantities and management and certificate of compliance with environmental regulations)

Companies that offer cleaning services in our facilities:

- Use eco-friendly or certified cleaning products with environmental labels.
- Safety in the use of chemical products (safety data sheets, safe handling procedures).

Santiago Pangua Cerrillo

Manager of Técnicas y Servicios de Ingeniería y Control del Norte SL
